Election/Restrictions

1. Applicant's election without traverse of Species II in the reply filed on 11/9/04 is acknowledged.
2. Claims 5, 26, and 42-43 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/9/04.

Claim Rejections - 35 USC § 112

3. Claims 45, 59, and 63-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 45 and 59 the phrase "the spaces" lacks antecedent basis rendering the claim vague and indefinite.

In claims 63-71 the phrase "a parting line" is confusing, vague, and indefinite because it is not clear what structural limitations applicant intends to encompass with such language. It is not clear what disclosed elements applicant is referring to with such language and therefore it is not clear what structures applicant intends to encompass with said language.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3728

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 6, 8-10, 12-14, 16-22, and 63-71 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dean (5704137).

6. Claims 23, 25, 27, 29, 30-39, and 63-71 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Swigart (6457262).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-4, 6-25, 27-41, and 44-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swigart in view of Roux (2002/0013967) or Graebe (4698864).

Swigart shows a shoe with a bladder having lobes encapsulated in a foam material substantially as claimed except for the exact shape of the bladder. Roux or Graebe teaches forming a cushioning bladder with a plurality of radial lobes shaped as claimed. It would have been obvious to form the bladder as taught by either Roux or Graebe in the device of Swigart to provide optimal cushioning/support.

9. Claims 1-4, 6-14, 16-27, 29-41, 44-57, and 59-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swigart in view of either Dean (5704137) or Schmidt (5545463).

Swigart shows a shoe with a bladder encapsulated in foam substantially as claimed except for the bladder being devoid of internal connections. Either Dean or Schmidt teaches bladders which have a plurality of interconnected chambers and the interior of such being devoid of internal connections. It would have been obvious to form the internal area devoid of internal connections (i.e. valves) as taught by either Dean or Schmidt in the shoe and bladder of Swigart to reduce the cost and weight of the device.

10. In reference to claim 2 and other similar claims which refer to the pressure of the air in the bladder, Swigart discusses numerous different pressures (column 5 lines 28-35). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use air at a pressure of 0-5psi, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.
